MD ASHRAFUL ALAM
MERN Stack Web Developer

ABOUT MYSELF :

Hi. I am a MERN Stack Web Developer. I do front end and bank end work using JavaScript, React and Node JS and some supporting tools. I like to work with the web and I love being immersed in work. My biggest weakness is I love to learn something new. I want to work with React Native in the future. App development needs to be handled a little. I also know about WordPress theme development and customi-zation. I never hesitate to take up the challenge.
